

END of DAY (SCHID=1, 22 & 25)

FREQUENCY

This schedule contains those jobs which run at the end of each business day schedule. The functions include processing of audits, alerts, notices, & reports. There are three different schedule ids which correspond with the different daily schedules. 'SCHID=1' runs on Monday, Wednesday, & Thursday. 'SCHID=22' runs on Tuesday and 'SCHID=25' runs on Friday. The 'END of DAY' flow is identical on all three nights - the only difference are the job dependencies. For example, on Tuesday there are BI jobs which produce audits that don't run on other days - so the audit processing has additional dependencies to ensure it runs at an appropriate time. Great caution must be given to the SCHID used - it should correspond with the CEPDAILY SCHID for that evening. Due to holidays, the SCHID may change just as the CEPDAILY schedule does.
